

SECURE DATA TRANSFER

By e-mail to info@roos.gmbh

Data transfer for large amounts of data: WebFileServer

For access data to the WebFileServer or general questions about print data, please contact our prepress department directly: Tel: +49 (821) 74 86 88-16

DATA FORMATS AND RESOLUTION

- only as PDF or JPEG files
- resolution of images at least 300 dpi

COLOR DEFINITION

- in pure CMYK colors (Cyan, Magenta, Yellow and Key)
- in spot colors

CUTTING

- Trim must be created on a separate page/level and color-coded
- Endcut tolerances up to +/- 2 mm.
- Place logos, texts and objects that must not be trimmed from the trim edge inwards with at least 3 mm spacing
- The elements that should go to the edge after the Endcut must go out about 3 mm further in the layout
- we recommend you to omit optical frame lines that go around or partially along/parallel to the cutting edge

UV VARNISH

- Create UV coating on a separate page/level
- Mark UV coating with a special spot color

LOGOS

- Create logos in vectors

SPELLING AND TYPESETTING ERRORS

We accept no liability for spelling and typesetting errors in the data supplied. Therefore, always check your data thoroughly for errors in content.
